

## Elligo's Site*Select* Model

### Simplified Trial Placement Powered by the Study Marketplace

Elligo offers direct access to over 500 elite healthcare-first and traditional research sites through our proprietary IntElligo® Study Marketplace technology, making site selection convenient, fast, and precise.

For traditional and decentralized trials, including virtual and hybrid.

### Accelerate Your Site Selection

Let Elligo take care of trial placement:

1. We offer your trial to all registered sites on the Study Marketplace, a subscription-based site engagement platform
2. Interested sites apply
3. We curate a list of the very best sites for you, resulting in faster turnaround times and more precise selection

### Access Elite Sites

The Study Marketplace gives you a direct line to 500+ of the very best sites.

#### Highly Experienced — Many sites have conducted 100+ studies

- High-quality conduct of even the most complex protocols
- Protocol feedback to reduce rate-limiting factors and optimize study design

#### Expansive Therapeutic Reach — Many are multispecialty

- Easily place studies in all therapeutic areas

#### Proficiency in Every Phase — Including Phase I

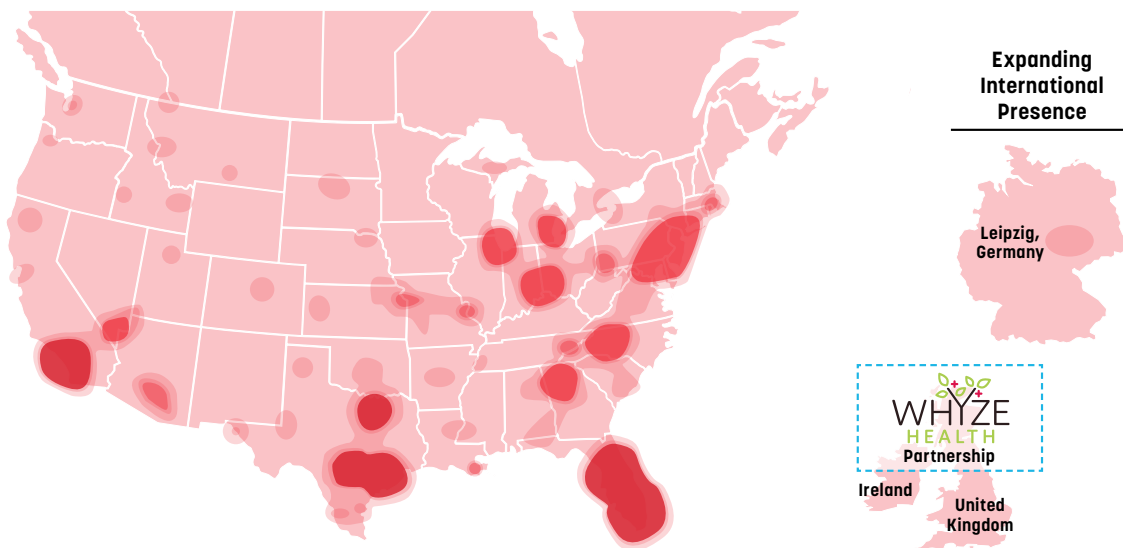

- Confidence in all research stages

### Elligo-Enabled — Many are fully powered by Elligo’s comprehensive research support

- Integrated eSource, workflow, and full financial management to reduce study timelines and administrative burdens
- Protocol/CTA to FPI ready in 72 hours, including financials and source templates
- Quality management and inspection readiness program with 99% regulatory first submission success rate and zero critical findings or 483s from FDA inspections
- Audit-readiness through paperless IntElligo eSource and electronic site files

### Connect With Sites Nationwide

### Increase Participation in Research as Care

#### Better Patient Retention

- Standard patient dropout rate of 30%+ vs. Elligo rate of 12.8%<sup>1</sup>

#### Increased Patient Diversity

- Standard Black/African American and Hispanic/Latino Research participation rate of 10% vs. Elligo rate of 26%<sup>2</sup>

### Site Selection — Handled

Offering a uniquely unified clinical research ecosystem spanning the entire patient journey and trial process, Elligo increases access to research participation, improves site conduct, and accelerates studies.
