

ELLIGO'S REMOTE RESEARCH SERVICES

INCREASING PATIENT CENTRICITY AND REDUCING THE STUDY BURDEN

Only Elligo Health Research® manages and centralizes all decentralized and hybrid trial requirements to streamline the study process, maintain the trusted patient-physician relationship, and expand research participation.

Patient Navigator Coordination

Supports patients and caregivers throughout their study journey by providing a central point of contact to assist with:

- Visit reminders
- Study-related screenings and assessments
- Home healthcare logistics
- Transportation booking and support
- Reimbursements

Home Trial Services

Brings the trial directly to the patient, wherever they may be, through:

- Direct-to-patient visit support
- Lab and investigational product management
- Rating scale administration by trained raters
- Centralized communication and reporting

Telemedicine Remote Patient Care

Connects patients to physicians and site staff via virtual:

- Education and engagement
- Remote admissions
- General care
- Protocol reminders
- And more

Data Management

Enables and elevates remote-based monitoring to make trials more accessible and offers:

- Paper source management
- Direct communication between site staff and monitor
- Query management
- eSource integration
- Rapid startup

Available in 50+ Countries to Help Reach the Unreachable

Fully Customizable to Make Trials More Accessible for Patients and Research Staff

Supported by Remote Recruitment Solutions Including Digital Advertising, Social Media Campaigns, and eConsent Forms

ABOUT ELLIGO HEALTH RESEARCH®

Elligo Health Research accelerates clinical trials through healthcare with access to over 150 million known patients and their HIPAA-compliant healthcare data, our IntElligo® Research Stack technology, and our PatientSelect identification and engagement model. Coupled with the largest Known Patient Access Network, Elligo's Site Solutions enable healthcare practices and research sites to participate in clinical trials. By adaptive engagement of known patients and physicians, we accelerate the development of new pharmaceutical, biotechnology, and medical device and diagnostic products.
