

ELLIGO
HEALTH RESEARCH®

Goes Direct®

Successful Clinical Research Post-Pandemic: Go Direct to Healthcare Experts and Their Patients

How We Move Forward

As the ultimate healthcare-enabling research organization, the mission of Elligo Health Research® has always been to bring clinical research directly to clinical healthcare, solving patient access challenges by enabling research as a care option. Through our existing capabilities, we immediately expanded our efforts to provide solutions to contribute to ongoing risk mitigation and continuation of clinical research.

Conduct research
with fewer patient and
monitoring visits to the site

Utilize technology
that allows data to be
accessible remotely

Implement prudent
measures to ensure
patient and staff safety

Allow best practices
to be shared among
participating sites

While we all continue to maintain vigilance to react accordingly in the event of any local resurgence of the virus, as the ultimate healthcare-enabling research organization, Elligo can provide a full spectrum of solutions to help you manage your clinical research, including:

Patients Stay With Their Physicians

Retain the integrity of the trusted patient and physician relationship by enabling patients to participate in clinical research with their own physician.

Full and Secure Remote Monitoring Capabilities

Powered by our proprietary eSource/CTMS platform, IntElligo® Research Stack technology, all study-specific information is available remotely 24/7.

Accelerated Startup Capability

Elligo's project leadership, made up of centralized project management (PM), regulatory, and contracting teams, allow for consistent training across all sites, clarity in communication, and rapid startup processes.

Direct Access to Data

Established, secure data connections provide data products to determine deep protocol feasibilities that dictate enrollment while also showing ongoing process improvements through trending performance reports with decreased risk.

ONLY**ELLIGO**

Minimum Risk Mitigation

Through Elligo's direct site feedback, data, and experience we developed our Minimum Risk Mitigation recommendation for conducting research in our network.

Elligo understands the need to work efficiently, safely, and inclusively to successfully provide access to treatments for patients. Only Elligo is prepared with the right technology, tools, and experience to provide you with the direct access to physicians, patients, and data you need for your clinical research program to resume trials after COVID-19.

What are the benefits of working with Elligo?

Accelerated Startup	Precision and Accuracy	Increased Participation	Integrated Support
<ul style="list-style-type: none"> • Operate under one contract and budget regardless of number of participating sites • Maintain a competitive cost structure consistent with the existing market • Access Elligo's exclusive healthcare network – our practices conduct all research through Elligo 	<ul style="list-style-type: none"> • Receive accurate patient enrollment projections using EHR data and our IntElligo ResearchConnectSM system • Implement SOPs and processes to ensure quality, efficiency, and execution readiness • Capture real-world data from patients at real-world sites 	<ul style="list-style-type: none"> • Leverage our physicians' trusted relationship with patients to keep patients engaged and enrolled • Improve convenience for patients by helping physicians conduct research in their office 	<ul style="list-style-type: none"> • Collaborate with an experienced research coordinator at each practice • Maintain oversight of site activation, patient enrollment, study initiation, and study conclusion • Get real-world protocol analysis and design input • Receive ongoing coordination with auditors and central IRB support • Access centralized services including regulatory and project management

About Elligo Health Research®

Elligo Health Research, a healthcare-enabling research organization, uses electronic health records and the trusted patient and physician relationship to ensure all patients have access to clinical research as a care option. Powered by our *Goes Direct*® approach and novel IntElligo® Research Stack clinical technology, our team provides access to the best healthcare experts, patients, and research technologies. We engage physicians and patients who otherwise would not participate in clinical research and accelerate the development of new pharmaceutical, biotechnology, and medical device and diagnostic products.
