

ONLY ELLIGO

**ACCELERATES YOUR CLINICAL TRIAL
THROUGH HEALTHCARE**

Elligo Health Research® offers direct access to 150M+ known patients with their trusted physicians and research practice management solutions.

Clinical Trials Are Facing Real Challenges:

95% of physicians and patients do not participate in research

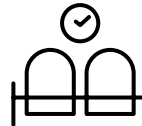

85% of trials miss their targeted timeline

It takes 7-13 years to develop a new drug

Research has less than 15% minority representation

The average clinical trial patient dropout rate is 20%

Every day delayed to market results in lost revenue of \$600K-\$8M.

Elligo Is the Answer

Elligo Health Research's adaptive engagement model, consisting of Patient*Select*, Site*Select*, Research Partner Services, and our proprietary technology portfolio provides access to the best patients, healthcare experts, and research solutions.

As the ultimate healthcare-enabling research organization, we optimize the intersection of healthcare and research, maintain the integrity of the trusted patient-physician relationship, and leverage electronic health records to accelerate the development of new pharmaceutical, biotechnology, and medical device and diagnostic products while bringing more patients clinical research as a care option.

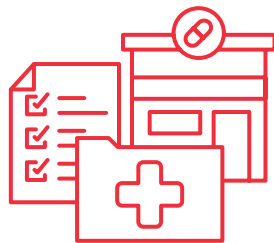

TWO COMPREHENSIVE MODELS FOR CLINICAL TRIAL ACCELERATION

PatientSelect

Focusing on the patient healthcare journey, PatientSelect offers direct access to more than 150 million known patients through HIPAA-compliant identified healthcare data and customized services to optimize the intersection of healthcare and research and accelerate clinical trials.

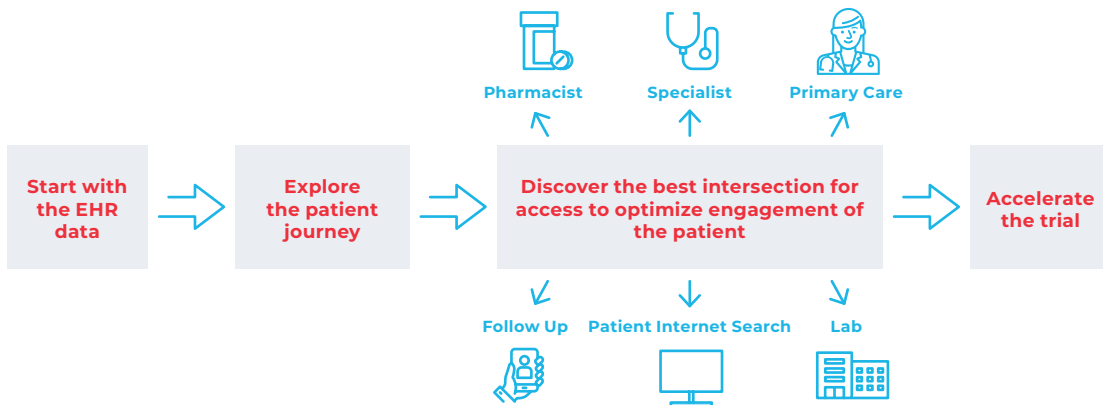

SiteSelect

Improving research site performance on customized and conventional trials, SiteSelect optimizes site selection through our network of 600+ fully powered healthcare-first sites and Elligo-supported conventional sites, as well as our study-specific site services.

PatientSelect

Optimize the intersection of healthcare and research and accelerate clinical trials.
