

Streamlining data collection from patient identification to study close.

IntelliGO Research Stack™ technology is the only system designed to work in a real-world healthcare environment, collecting data at the point of care using CDISC global research data standards, then automatically using it for regulatory compliance and study operational management.

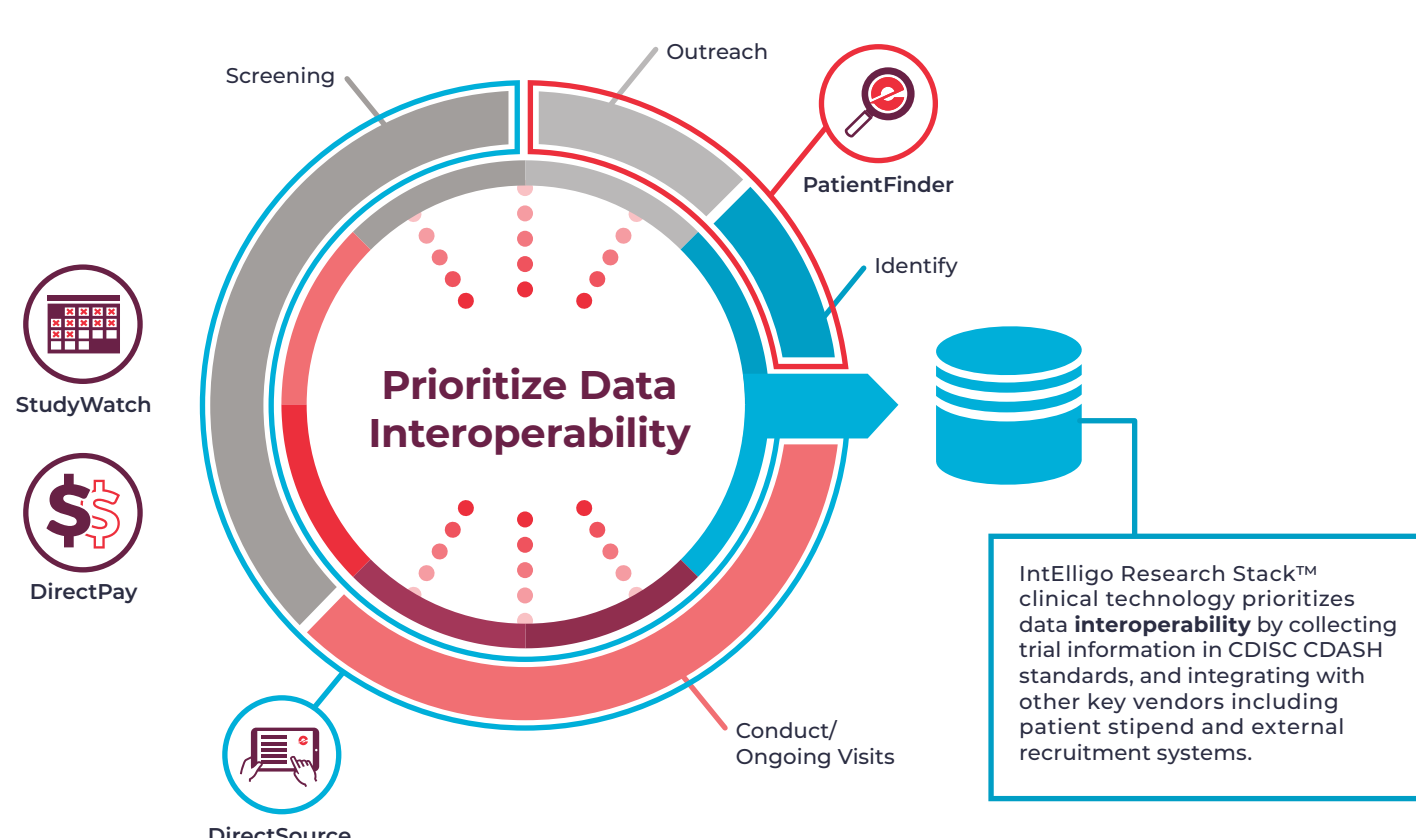

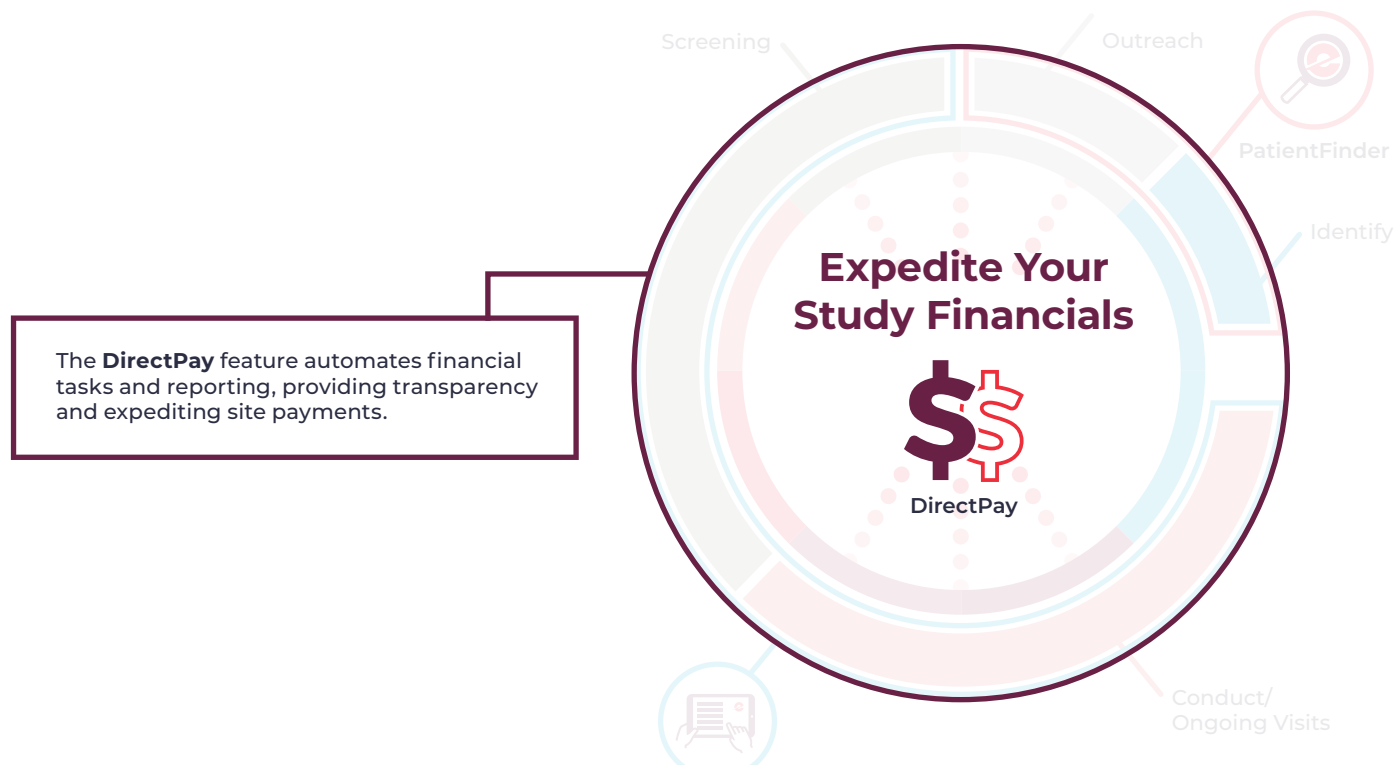

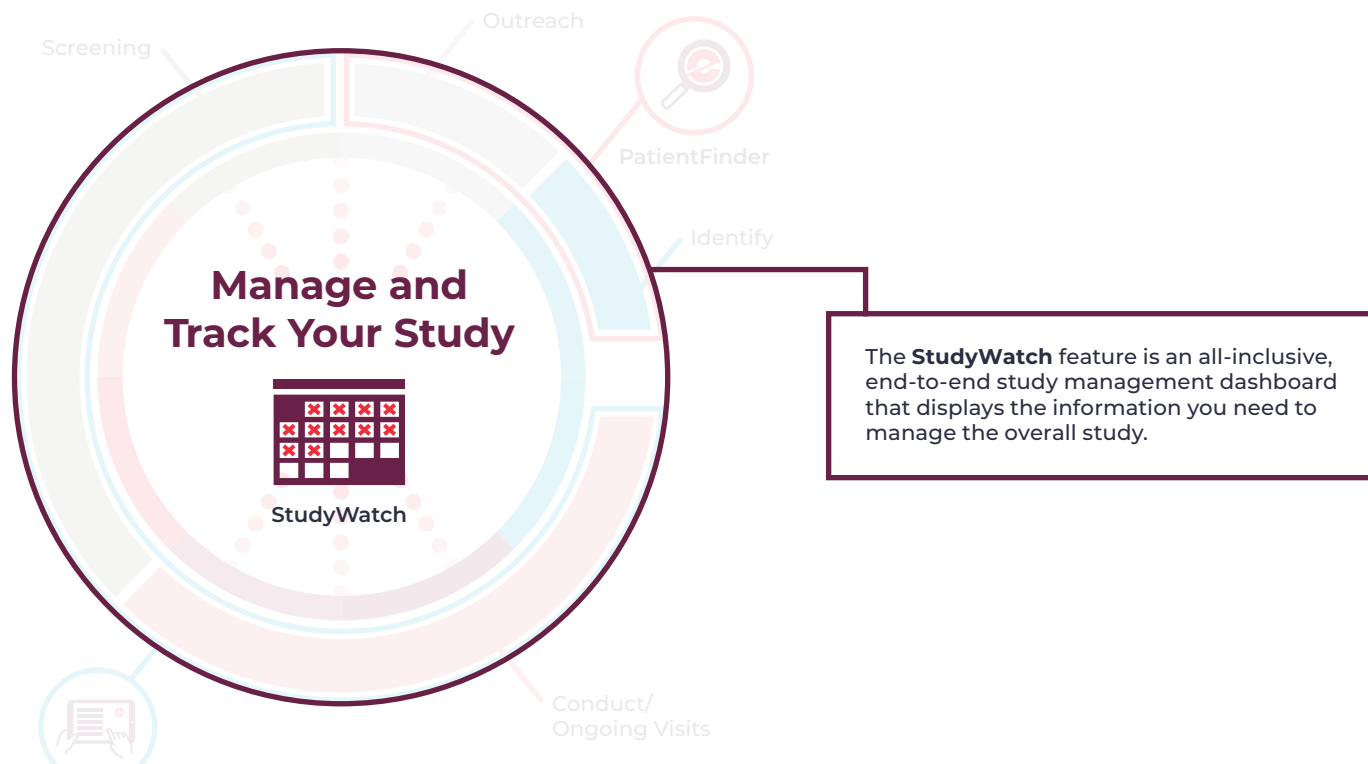

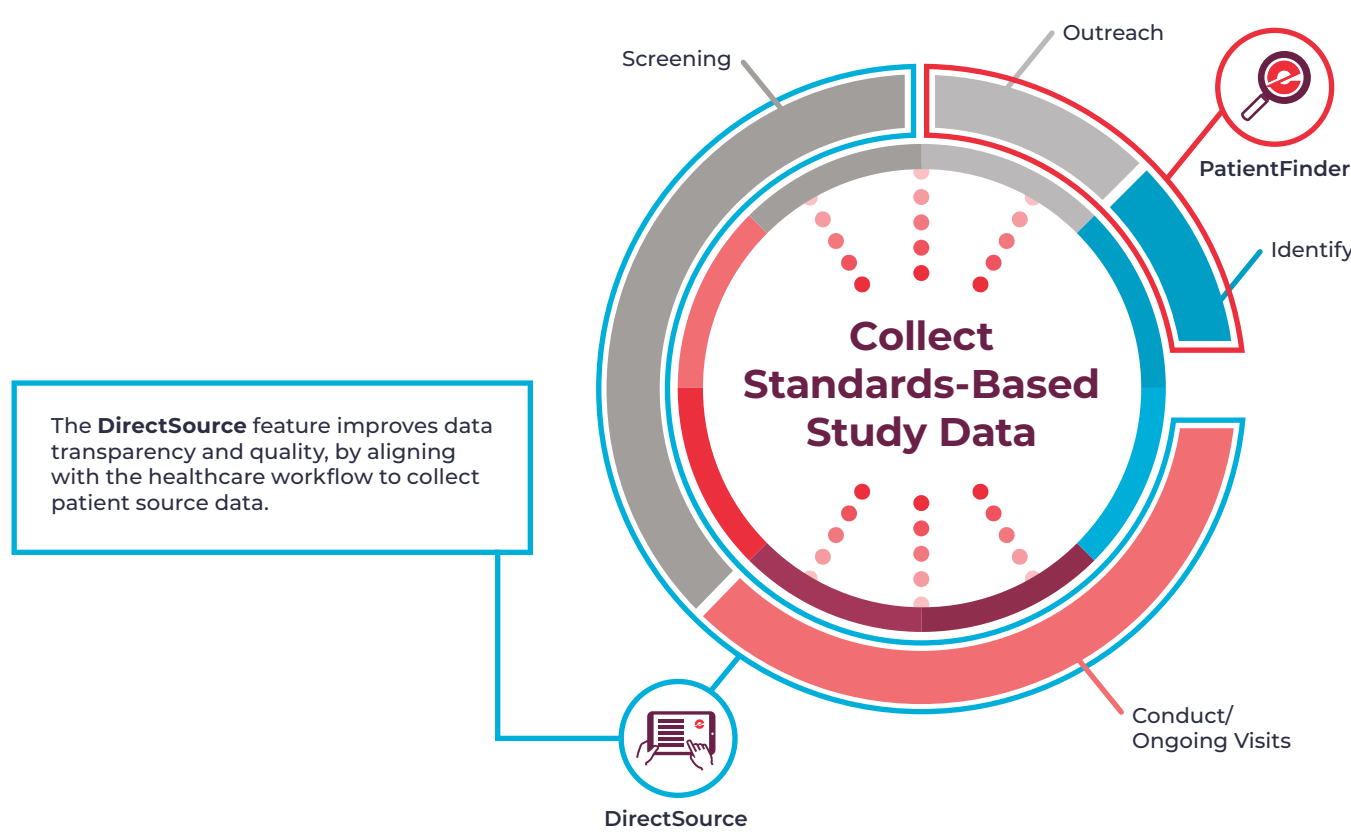

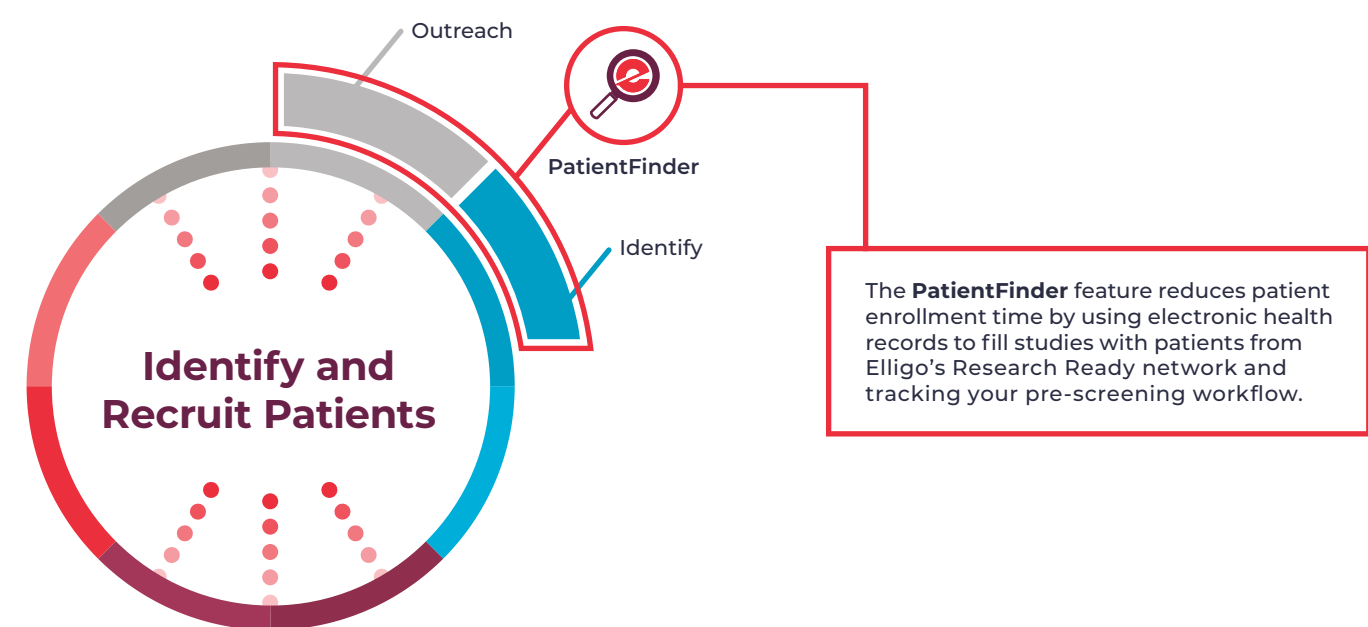

Standards-based source data collection

Streamlined study operations

Real-time data updates and analytics

The IntelliGO system accelerates and enhances data collection from feasibility through submission by automating administrative tasks, alerting for any quality issues, and streamlining data output — all while maintaining the integrity of the trusted physician and patient relationship.

Physicians
// Easier oversight
// Remote reviews
// Reduced tracking
// Easier access to data
// Support for healthcare workflow
// Faster payments

Sponsors
// Improved visibility
// Remote monitoring
// Transparency to real-time patient journey
// Interoperability
// Patient centricity
// PI satisfaction

Elligo
// Quality oversight
// Efficient study conduct
// Real-time transparency
// Paperless study conduct
// Automated study administration processes

### About Elligo Health Research

Elligo Health Research, a healthcare-enabling research organization, uses electronic health records and the trusted patient and physician relationship to ensure all patients have access to clinical research as a care option. Powered by our *Goes Direct*® approach and novel IntelliGO Research Stack™ clinical technology, our team provides access to the best healthcare experts, patients, and research technologies. We engage physicians and providers who otherwise would not participate in clinical, and research accelerates the development of new pharmaceutical, biotechnology, and medical device and diagnostic products.
